Our goal is to build a Student portal for an esteemed University.
The site will be accessed by
- Students -
  - who has the access to view any notice posted on the homepage dashboard.
  - Can view or download study materials and assignments of their respective stream only.
  - Note: Graduated students should not be able to access the above assets.
- Academic Head
  - Who has access to upload study materials, videos and assignments
- Administrator
  - Has the access to block a student from accessing the portal and assets
  - Can upload notices on homepage dashboard
  - Can add/edit/delete the assets added by Academic Head.

There will be the following pages in the website:
- Homepage
  - To display the top 5 active students on left side of the page
  - In the middle, all the notices posted will be visible in latest to oldest order. The notice section should be visible anonymously.
  - A search bar to be implemented using which all related data can be search in site.
  - Sign In/Sign up button should be available on header.
  - Link to go to the respective **Stream** page. This link should not be visible to anonymous users.
- Stream
  - There should be a page with the respective stream names
  - This page will display the list of subjects
  - On click of each subject link the available study materials, assignments and other assets should be available in a chronological order available to be downloaded.
  - Upload or edit options should be for Academic Head and Administrator. These options should not be visible to Students.
